## ITALIAN CONCEPT, DESIGN AND MANUFACTURE

La nostra storia ruota intorno alla passione. Innanzi tutto quella che in Webert mettiamo nel nostro lavoro di squadra, che consiste nel creare linee che esprimono eleganza, dando spazio ad un design giovane, moderno ed emergente. Ma la passione per ciò che realizziamo ci porta anche a nutrire un assoluto rispetto per chi sceglie i nostri prodotti. Ai quali il nostro cliente chiede raffinatezza, affidabilità, funzionalità e il giusto rapporto tra ciò che acquista e ciò che spende. È dal 1975 che questi valori ci guidano. Hanno fatto di Webert un'azienda che, nell'arredobagno italiano, significa innovazione, qualità e rigore. Sono le caratteristiche che ritrovate anche oggi nella nuova gamma di prodotti presentata in queste pagine.

.....

The history of Webert revolves around passion. Primarily the passion that we put into our teamwork, which involves creating lines that embody elegance while giving space to young, modern and emerging designs. This passion for our creations goes hand-in-hand with total respect for the people who choose our products. Our customers want refinement, reliability, functionality and value for money. These have been our guiding values since 1975. These values have turned Webert into an Italian hallmark for innovation, quality and precision. These are the values you can still find all these admirable qualities today in our new range of products.

Un connubio di modernità ed eleganza senza tempo, l'acciaio, un materiale nobile ed eterno, associato a un senso di freddezza e austerità è reso più organico e caldo dalla finitura sabbia-ta. Le forme nette e più spigolose della bocca si accordano perfettamente a quelle più morbide del corpo come in un moderno edificio o un'installazione artistica. Ideale per un ambiente bagno che non cerca compromessi, elegante nella sua semplicità, innovativo, moderno, risoluto...

A union of modernity and timeless elegance, steel, a noble and eternal material, associated with a sense of coldness and austerity, is now more organic and warmer. The sharp and angular shapes of the spout perfectly match the softness of the body as in a modern building or artwork. Creata dal Designer Massimiliano Settimelli, la linea Aria custodisce un'energia dinamica capace d'infondersi in tutto l'ambiente del bagno. Dall'unione di design e natura nasce il lavabo a cascata, nel quale, racchiusa sotto la leva, si apre la scanalatura che rivela lo scorrere dell'acqua. La plasticità decisa del corpo centrale si piega verso la sottigliezza della bocca, in un'unica linea continua, che per dinamismo e fluidità, sottolinea il legame tra questa collezione e il suo elemento: l'aria.

Created by the designer Massimiliano Settimelli, Aria series holds a dynamic energy able to infuse itself in the entire bathroom space. The combination of design and nature generates a waterfall washbasin mixer. The groove under the lever disclosed the water flow. The firm plasticity of the central body bends towards the fineness of the spout in a sole and continuous line emphasizing, thanks to its dynamism and fluidity, the tie between this collection and its element: air.

Aerodinamicità e leggerezza sono le idee ispiratrici della linea WOLO, disegnata da Massimiliano Settimelli. Il suo corpo affusolato e slanciato si assottiglia esattamente come l'ala di un aereo, mentre nel gruppo vasca, sviluppo orizzontale e slancio verticale sembrano cogliere l'attimo iniziale del volo. Con il nero opaco, il bianco opaco e l'oro satinato, la linea Wolo spicca un salto verso le nuove tendenze.

Aerodynamics and lightness are the inspiring ideas of the WOLO series, designed by Massimiliano Settimelli. Its tapering slender body grows thinner just like an airplane wing. Whereas in the bath filler tap the horizontal expansion and the vertical soaring lines seem to seize the initial moment of the flight. In matt black, matt white and satin finish gold, Wolo series leaps towards new trends.

Do Re Mi ha linee semplici e originali. Il suo design, nato dalla matita di Massimiliano Settimelli, trova ispirazione nelle forme di una partitura musicale, nel segno semplice e inequivocabile di una nota. È una collezione che gioca con gli elementi per creare una perfetta armonia d'insieme, e dare vita a un suono: quello che solo lo scorrere dell'acqua può trasmettere.

Do Re Mi has got simple and original lines. Its design, created from the pencil of Massimiliano Settimelli, draws inspiration from the lines of a music score, from a simple and unambiguous musical note. This collection plays with the elements in order to create a perfect harmony and to give life to a sound: the sound that only water flow can convey.

Miscelatore lavabo 3 fori.  
3-hole basin mixer.

Disegnata da Massimiliano Settimelli, Karenina è pensata per fare del bagno un ambiente ricercato, avvolgente e lussuoso. Le sue forme sinuose ed eleganti, le maniglie di cristallo: sono i dettagli che rendono ancora più raffinato un design che nasce già ricco e prezioso. Nel rubinetto o nel gruppo vasca, la manopola non cambia mai il suo aspetto.

Designed by Massimiliano Settimelli, Karenina has been conceived to make the bathroom a refined, engaging and luxurious space. Its sinuous and elegant forms, the crystal handles: these are details which further refine a design that is already rich and valuable. Neither in the tap nor in the bath filler tap does the knob change its look.

Questi miscelatori sono progettati per controllare il flusso e la temperatura dell'acqua per una singola uscita, che di solito è il soffione della doccia. Sono costituiti principalmente da una valvola miscelatrice interna che regola il flusso dell'acqua calda e fredda e un'impugnatura esterna per controllare la temperatura e il flusso.

These mixers are designed to control the flow and temperature of water for a single outlet, which is usually the shower head. They mainly consist of an internal mixing valve that regulates the flow of hot and cold water and an external handle to control the temperature and flow.

Questi miscelatori hanno due o tre uscite che possono essere utilizzate per controllare due flussi d'acqua separati, ad esempio un soffione a soffitto e una doccia a parete. Hanno una struttura simile ai miscelatori con una sola uscita, ma con una valvola aggiuntiva chiamata deviatore che devia il flusso fra la prima, la seconda uscita e la terza uscita, il deviatore può essere meccanico, per le due uscite quindi con pulsante da premere per deviare che torna poi alla posizione originaria, oppure con deviatore ceramico per le due uscite e le tre uscite moderno ed ergonomico. Anche in questo caso, l'utente può regolare la temperatura e il flusso dell'acqua attraverso un'unica impugnatura esterna.

These mixers have two or three outlets that can be used to control two separate water flows, for example a ceiling-mounted shower head and a wall-mounted shower. They have a similar structure to 1-outlet mixers, but with an additional valve called a diverter that diverts the flow between the first, second and third outlet. The diverter can be mechanical, for the two outlets then with a button to press to divert which then returns to the original position, or with ceramic diverter for the two outlets and the three outlets, modern and ergonomic. Also in this case, the user can adjust the temperature and water flow through a single external handle.

Il rivestimento protettivo facilita la pulizia del box doccia. Grazie alle proprietà idrorepellenti del rivestimento, le goccioline d'acqua non aderiscono alla superficie del vetro, ma scivolano via senza lasciare residui.  
Glass protection coating allows to clean the shower enclosure easily. Due to hydrophobic properties of the coating, water drops does not stay on the glass but streams down without leaving the stains.
